

INNOVATION CONTEST

OBJECTIVE

The Innovation Contest is back and better than ever! This competition encourages students to use out of the box approaches for problem solving. Teams will develop solutions to their chosen civil engineering topic through the application process and receive coaching from industry professionals.

ELIGIBILITY

Per contest guidelines, no restriction on how many members can be in a team. However, teams between two (2) and four (4) members are recommended.

PROCEDURE

Please review the contest [website](#) for Innovation Contest [requirements](#) and [recommendations](#). The entry should address selected [civil engineering topics](#) and conform to the pilot requirements.

SUBMITTALS

Submittals must adhere to the contest guidelines. Please review the [application process](#) and [schedule](#) for the Southeast Region. Teams should prepare to bring a USB drive with any necessary presentation material for their shark-tank and poster presentation the day of the competition.

JUDGING

The scoring criteria and judging process for this competition will adhere to the contest guidelines.
