

Residential Recycling Study Intern

Focus Area:
Residential Recycling

NATURE OF WORK:

This position will assist on a summer-long recycling education and outreach initiative with the goal of decreasing the level of contamination present in the City's residential recycling stream.

This position specifically will be responsible for collecting data related to a City wide recycling education effort, concentrating mainly on the residential recycling program. Particular duties include (but are not limited to): baseline data capture, distributing promotional and educational material development, interacting with residents, conducting field work, as well as other tasks as assigned.

Potential skills to be gained from this position include the following:

- Survey techniques and other research methods
- Develop working solutions grounded in empirical data collection and best practices
- Networking and public outreach/education

MINIMUM REQUIREMENTS:

Undergraduate degree (or in pursuit), in Communications, Marketing, Environmental Science, Public Admin., Sustainability, or a related field. Ability to work outside for extended hours. Valid Florida driver's license is required.
